

6-HOUR CHAMOIS

For those long, demanding rides, Elastic Interface® Technology's top-of-the-line "Multi-D Anatomic Carbonium Men" short insert is improved with maximum comfort from new extra-thin ultrasonic seams and maximum performance from its unique curved anatomic shape and new E.I.T. Carbonium fabric. It's simply the best chamois ever.

TECHNOLOGY

Cross section image showing the different types of foam.

Perineal area suited for men's anatomy where it meets the bicycle saddle.

New extra-thin ultrasonic seams.

Varied densities and thicknesses of high density foam inserts.
